Setting Annual Member Registration Fees

The Branch registration fees for Scout Association members are reviewed annually with the fees being set after taking into account CPI, membership growth and other cost influences. It is the aim of the Association to keep any fee increase to a minimum with the goal, where possible, not to exceed CPI.

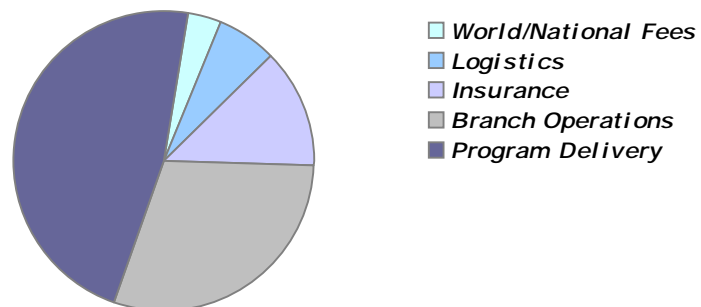

Although registration fees form an important part of the income stream for the Association, they account for less than 50% of the actual funding required to run the Association. To enable registration fees to be kept to a minimum, tight budgetary controls and other cost reduction initiatives are regularly explored as is the development of alternative income streams.

This year, in addition to registration fees, funding for the Association will be sourced from a variety of areas including the State Government, the Scout Association campsite at Byford and the Scout Shop as well as institutional and corporate grants and sponsorship.

The graphs below outline the key income and expense centres for the Scout Association of Australia – WA Branch
