

West Australian Scout Pioneering

Is the crew that, not only builds the bridge for the Royal show each year. But it also builds rope bridges & other structures for various community events throughout the year where, it is able to promote scouting. Another important role it plays is working with the BAL Pioneering who operates training courses for Venturers, Rovers & Adult Members. Wasp is also creating a register of leaders who are interested in setting up & operating bridges for community events where they can promote Scouts W.A & in some cases be able to gain donations for their group.

The aim of these courses is enhance the skills & knowledge so that candidates can be confident to operate a successful pioneering program within their group or to develop their own skills.

Pioneering is one of the traditional skills that, is still only found in scouting, and still popular as ever for community events.

Pioneering is also a great way to bring your leaders together in a unique team building environment
